Questions to Ask Your Doctor Before Taking **Opioids**

www.iupathelpinghand.com

Ask your health care provider these questions before taking opioids

- Why do I need this medication
 - is it right for me?
- How long should I take this medication?
- Are there non-opioid alternatives that could help with pain relief while I recover?
- Could this treatment interact with my other medicine for anxiety, sleeping issues, or seizures?
- How should I store my opioid medication to prevent other people from taking it?
- How can I reduce the risk of potential side effects from this medication?
- What if I have a history of addiction with tobacco, alcohol or drugs?
- What if there is a history of addiction in my family?
- Can I share this medication with someone else? Why not?
- What should I do with unused opioid medicine?
- Can I have an Rx for naloxone?
